DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

* The primary reason for allowance for claim 29 is the limitations of a liquid ejection head comprising ejection outlets of a first array and ejection outlets of a second array are aligned with each other, and outlets of a third array and outlets of a fourth array are aligned with each other, and wherein the outlets of the first array and the outlets of the third array are offset from each other, and wherein a same kind of liquid is supplied through the first liquid supply opening and the third liquid opening, and wherein the first outlet array disposed on a side of the second liquid supply opening facing away and the second outlet array being disposed on a side of the first liquid supply opening facing away from a direction where the first, second, and third liquid supply openings are provided on a substrate. It is these limitations either alone or combined as claimed that have not been taught, found, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
